

Why?

Why Deerhurst?

Brunelcare's care home concept offers a nursing-care lifestyle for older people with specific nursing needs, together with the option to call upon additional support to suit changing needs.

We provide a **person-centred** approach to care, using knowledge of a person's history and personality to assist us to provide the right support and maintaining dignity and choice.

Our care home is purpose built and designed to provide the best possible environment for people with care needs; particularly for those living with a dementia.

We want people who come to live in our care homes to make the most of life and we are committed to creating a vibrant home community in which each individual can thrive.

We offer:

- **Person-centred approach to your care**
- **Accommodation designed specifically to provide residential nursing care; including dementia care facilities**
- **A dedicated staff team on site**

Deerhurst is a Dementia Care Matters Butterfly Service® home. This means we are achieving a recognised national standard in dementia care, providing good quality of life through our person centred and relationship focused dementia care.

Our staff

The Home Manager is supported by a Clinical Manager, both of whom are also Registered Nurses, committed to helping people within their care make the most of their lives.

The staff team also consists of Registered Nurses, House Leaders, Senior Care Assistants and Ancillary staff.

All of our care home managers are registered with the Care Quality Commission.

Our staff are trained, qualified, equipped and supported to meet the diverse individual needs and preferences of those living in our home. Specialising in dementia and end of life care we provide regular training courses for our carers to build on their skills to meet the complex needs of our residents and their families.

We are fortunate to be supported by an enthusiastic group of volunteers who help us provide garden parties, musical entertainment and join us when we celebrate special occasions.
