

Features

Deerhurst Care Home Features

Our 66 bed home is split into three 'houses' catering for people living with or without a dementia, all providing an environment more stimulating to those living with a dementia.

We have a clearly signposted car park with generous parking space welcoming daily visitors. The building is easy to access and tour with a wheel chair.

Each room has en-suite facilities, central heating and television and telephone points along with a 24/7 **Nurse Call** system.

Residents are actively encouraged to bring small items of furniture and to personalise their rooms with pictures, plants and ornaments.

There are also communal lounges and dining areas where people can relax and enjoy activities, along with a hairdressing room on the ground floor.

The houses and rooms look onto a private, secure courtyard garden with plenty of areas to sit. The home is also surrounded by a beautiful, established garden with seating areas.

Purpose built design, aiding mobility

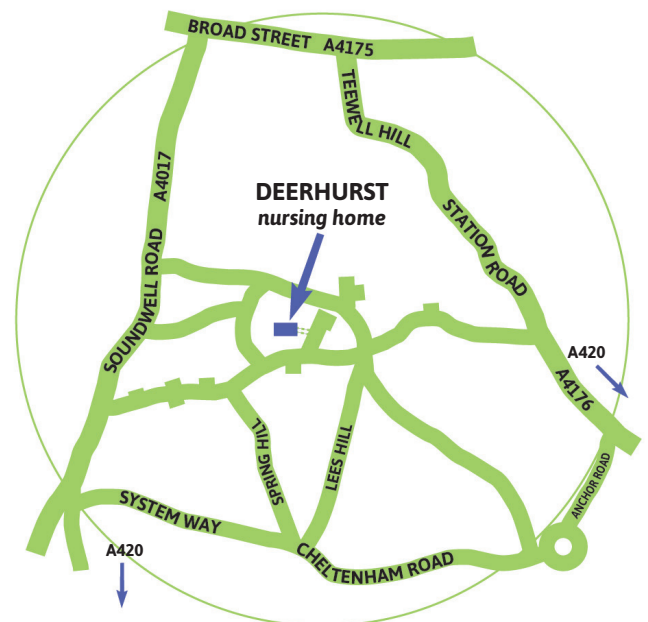

All Brunelcare nursing and care homes have been specifically designed for the purpose of providing residential nursing care to older people.

Our home has design features that meet special needs such as providing adaptations in the form of handrails, ramps for wheel chair access, lifts between each floor, nurse-call pendants and large print notices.

The wide and brightly coloured corridors and well-proportioned lifts are designed for wheelchair users.

Mobility aids we provide include stand-aids, hoists for transfers and bath hoists for bathing.
