## What is a gender pay gap?

Since April 2017 all companies with 250 or more employees have been required to publish their gender pay gap. A gender pay gap is a difference between the gross hourly earnings for both men and women regardless of the roles that they have. It is very different to equal pay, which is about making sure men and women are paid the same in roles of equal value.

This report shows the average pay gap in Brunelcare between men and women, expressed as both a mean and a median average.

## The numbers

The total number of employees that form the basis of this report is 1027.
Of the employees involved, $83.35 \%$ are female and $16.65 \%$ are male.
Our average mean pay gap is $13.15 \%$; this is higher than the previous year by $0.32 \%$.
Our average median pay gap is $4.79 \%$ which is $1.61 \%$ lower than the previous year and over $10 \%$ better than the national figure of $15.4 \%$ in 2021. (source).

| Women receiving a bonus | $9.3 \%$ | $12.0 \%$ | $10.0 \%$ | $115.3 \%$ | $7.36 \%$ |

We also note that our mean bonus gap has reduced significantly year on year and the median bonus gap shows a slight increase. One male employee has been removed from the bonus figures as he is employed on a payment by results contract leading to his salary being classed as a bonus which skewed the figures sufficiently as to make them meaningless.

We report how many people received a bonus during the year divided by gender. These numbers increased significantly in 2019/20 due to the payment of a bonus to all employees. As new employees during the year were also awarded bonuses this meant that both figures exceeded 100\%.
